Features & Benefits

Performance

Consistent excellent growth and development in growing layer pullets. Formulated for flock uniformity and body development to prepare the pullet for the laying period.

Convenient

No further mixing required. Flows well in silos, augurs, feeders.

Consistent

Guaranteed to meet specifications for pullets from 12 to 17 weeks of age.

Palatable

Delicious feed blend, encouraging optimal intake and digestion for strong, thriving animals.

Expert Formulation

Pullet developer is specifically designed for the correct development of replacement layers.

Feeding Directions

- Suitable for layer pullets.
- Can be used between 12 to 17 weeks of age.
- Supply feed on an ad lib basis and always ensure birds have unlimited access to fresh, clean water.
- Do not blend or dilute with any other feed without seeking professional advice.
- Speak to a Reid Stockfeeds Nutritionist to obtain tailored advice for your individual circumstance
