Loads**Features & Benefits****Performance**

Enhances dry matter intake and milk production in dairy cows during the critical pre- and post-calving period, ensuring optimal health and productivity.

Convenient

Streamlines feeding routines with a specialised mix designed for easy incorporation into the last three weeks of pregnancy regimen for dairy cows.

Consistent

Provides reliable nutrition to support smooth calving processes, reduce complications, and promote healthier post-delivery outcomes for both cow and calf.

Palatable

Offers a palatable blend of cereal grains, protein sources, and minerals, encouraging consistent consumption and ensuring the well-being of mother and calf.

Feeding Directions

- Introduce grain gradually to avoid rumen upset.
- Feed for a minimum of 21 days prior to calving, and a rate of 3kg per cow per day, with ad lib access to good quality cereal or pasture hay, and a small amount of pasture (if available).
- After calving, remove Springer 16 from the diet.
- Ensure livestock always have access to clean, fresh water.
- Recommended feed rates may vary, depending on fodder quality, stage of cycle and liveweight. Speak to a Reid Stockfeeds Nutritionist to obtain tailored advice for your individual circumstance.

Ingredients Selected From

Wheat, barley, lupins, canola meal, canola oil, molafos, anionic salts, urea, flavours, vitamins, and minerals.

Storage Requirements

Store in a vermin free, cool, dry place, protected from direct sunlight. Best within 6 months of manufacture date.
